

Compashield® splice quality requirements:

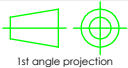

No reduction of the shielding properties in the splicing area. Splicing rubber thin and conductive.
 No flash, porosity or excess rubber at the joint after splicing.
 Max increase of compression force in the splicing area 5%. No excess splicing rubber inside hollow profiles.
 Joining point should stand for 10% stretch without mechanical damage

Cross-section area0,82mm²**Electrial resistance measure:**

Methode: Nolato R3 Max:300 mOhm
