2 1 3 4 Cross-section area Compashield® splice quality requirements: No reduction of the shielding properties in the splicing area. Splicing rubber thin and conductive.

No flash, porosity or excess rubber at the joint after splicing.

Max increase of compression force in the splicing area 5%. No excess splicing rubber inside hollow profiles.

Jointing point should stand for 10% stretch without mechanical damage 3,96mm ^2 Α **Electrial resistance measure:** Methode: Nolato R3 Max:300 mOhm В С С  $\emptyset$  2,8 ±0,1 D  $\emptyset$  4,5 ±0,1 Е Art.nr **Material** Lenght Weight/m Splice Е REVISIONS 1193100 8648/1540 Roll 9,5g / 7g No REV.
